DOWN WITH THE ANARCHISTS.

"Down with the anarchists" is a cry now being echoed and re-echeed around the world, a refrain that is being sustained in the prints and discussed in legislative halls everywhere. But what is an anarchist? Who is he? Where is he? These are questions which are being found hard to answer. Only after he has cropped out as an assassin, or has been caught in some overt act, are we sure of him. When it comes to drawing a legal definition, or to giving such a definition as would do for the basis of a law, the problem becomes a difficult one. The teachings of Tolstol. Krapotkin and other socialists who dream of a personal freedom in which there shall only be a minimum of legal restraint, of an ideal society without rulers where all shall be on a level and brothers, may be impractical, they may be but dreamers, yet the teachings of these inspire the Emma Goldmans and the Herr Mosts, from whose ranks spring the Czolgoszes, the Guiteaus, et al. Unquestionably there is a line between the socialist and the anarchist, be tween the progressionist and the assassin, but who can define it in such legal terms as will prove constitutional? In short, is there any sure and comprehensive way for getting rid of anarchists, and of possible assassins other than by classing all such people as crim-Inals, or as insane, and putting them en masse into asylums or into penal institutions?

Following the assassination of the president of the French republic the United States congress came within republic, Mr. McKinley's mother shook her head doubta single objection, made under the rules, of passing a law fully when she was congratulated on her son's ascension against anarchy, which would in all probability have saved to the highest position in the country. "I would rather the life of McKinley by making a Czolgosz improbable, If not impossible. It was a non-partisan measure and both houses and all the committees to which it had been rehit, objected to its unanimous consideration, so it was lost. It seems that every attempt in the past to nationally legislate against anarchism has been frustrated by minorities to hitch up a horse for a brother to go to a dance?" who have deigned no explanation. But the people of the United States are so unanimously demanding a congressional enactment, now, that some measure more or less definite and drastic may be looked for. A number of bills have already been introduced and others proposed.

Speaking of the difficulty found in defining anarchism, the North American Review of this current month is largely taken up by prominent statesmen in the discussion with the trouble, but that, by united international effort, at Chicago's educational midway. through the police forces of all, this menace to life and if not entirely obliterated.

for intelligent human beings is an unneccessary burthen, fessor affirmed that man has within him a liability to up, higher, birber. That's it."

for intelligent human beings is an unneccessary burthen, fessor affirmed that man has within him a liability to up, higher, birber. That's it."

I hate to do it, Kennedy," said for intelligent human beings is an unneccessary burthen, fessor amirmed that man had been sometimed that had been sometimed th from the man with a liberal education, so far as anarchism intensity. In other words, a murder in passion is a moral goes. The anarchist, if properly enlightened, would never both, which leaves the murderer a better citizen and a liberal education, so far as anarchism intensity. In other words, a murder in passion is a moral gister—and—f condition; gister—and f co

Isitude and longitude of the 'corn belt,' that we very much question whether any two minds agree on the subject.

There never has been and there is not now any rule by which the 'belt' can be fixed, and when it has once been established by general consent and approval, the lines are liable lished by general consent and approval, the lines are liable feat of mon. The Chicago women resented it. The Hoff- can be fixed at one of the houses for a meal supposed at one of the house for a meal supposed at one of the house for a meal supposed at one of the house for a meal supposed at one of the house for a meal supposed at one of the house for a meal supposed at one of the house for a meal supposed at one of the house for a meal supposed at one of the house for a meal supposed at one of the house for a meal supposed at one of the house for a meal suppos this 'belt' wholly within its borders, but now lowa, Neclaim for it. The fact is uncontroverted that during the do he will smuch it flatter than a cocked hat, tive years ending with 1900, much abused Kansas grew states, and as a strictly corn-producing state, Kansas ranks have obtained it in the church. And in that day we will fifth on the list. It is well not to 'sneer the lip' when speaking of Kansas. Things are grown there." .

## ROOSEVELT ON IRRIGATION.

President Roosevelt, in his message to congress, has presented an adjustment of the trouble obtween Kansas a plume in his hat, is carried out, it will cost the government \$75,000 annually. But think how it would gratify Arkansas river. Unintentionally, we believe, he gives the latter state two or three "jahs in the slats," which certitude in this matter is not justifiable.

The chief executive recommends that congress take such measures as will lead to the construction of imsuch measures as will lead to the construction of im-mow a sewer-diager, getting \$1.50 per day. But it wasn't mease reservoirs at the headwaters of the large streams, the curved ball which floored him, but the high ball. wherein the flood waters can be stored, and in the dry seasons be turned into nature's canals to take their natural out of a job. The latest witticism in London is that all course to the sea. This work to be carried out by the nation and for the whole nation's welfare. As a guarantee for the secress of this enterprise, must be cancied laws crowd's Yacht race is paying for it. He evens copper stock which will control and distribute impartially these waters. abundant if not hogged by a few hundred greedy irrigation

injustice, the endering wrong of which is beyond the retrograde and unbackle blurself of the kneet. reckoning of humans, has been perpetrated on us by our sister state.

### RELIABLE ANECDOTES OF M'KINLEY.

Stories about President McKinley are now being col lected from every possible source. The result is a most thrilling and varied illumination of a well-loved character. Among the newest anecdotes collected are the following:

An intimate friend, with whom he was chatting one day on the subject of his will, remarked upon the smallness of the president's estate, whereupon Mr. McKinley sald: "No, I don't leave much, but what I do leave was honestly acquired, for it never cost anybody a tear or my country a penny."

A number of senators were talking on the different forces and powers of the world, and the conversation Hitchcock, suppling his pair into his coat drifted to the subject of the heads of states, "I don't envy Chuck, but if you don't mind I'll bet a drifted to the subject of the heads of states. "I don't envy any one of them the power which Providence has given to then," said the president, "but there is one thing of which I may be allowed to boast, which is, I fear no man. I fear neither the revolver, nor the burglar, nor the spleen of an injured citizen"—a curious and pathetic sentiment in the light of what occurred at Buffalo.

The McKinley was a careful reader; he slowly diseased.

The won the wheel."

Two of the players dropped out and shock out of the lamp-lighted from. A fertican issner, who smelled of his trade, Combilly, the one-eyed back driver, and filtebrock were all that sat in at the realist the Englishman bet tens, and Chuck felt sorry for the stranger.

The trade of the wheel."
